7105kHz +/- QRM from 8-30am (2230UTC)

The net control station calls in regular stations and then invites new stations to call in.

If conditions are poor other relay stations will attempt to assist contacts. If conditions are very poor Net Control might move the net another frequency (including 3600kHz) depending on how responsive the net participants are.

Mix it with other operators, be ready to assist and call in on the net !!
