- Curly Wind Season is happening now. Be prepared.

Have you checked your shack and your antenna to see how they will go during the wet season ?

Have you stocked up, charged batteries and are ready for action !

Get on air - scare the spiders and lizards out of the rig and make sure your transceiver works.

- WICEN VK4 NET

Operators interested in maintaining reliable contact in case of infrastructure failures in Queensland hold a net every Sunday.

The net happens on

14125kHz from 8-00am (2200UTC)

10122kHz from 8-00am (2200UTC)

7105kHz +/- QRM from 8-30am (2230UTC)

The net control station calls in regular stations and then invites new stations to call in.

If conditions are poor other relay stations will attempt to assist contacts. If conditions are very poor Net Control might move the net another frequency (including 3600kHz) depending on how responsive the net participants are.

Mix it with other operators, be ready to assist and call in on the net !!

Emergency Frequencies per IARU region - active during disasters

IARU Region 1 3760 7110 14300 18160 21360 kHz

IARU Region 2 3750 3985 7060 7240 7275 14300 18160 21360

IARU Region 3 3600 7110 14300 18160 21360

VK is in Region 3.

Frequencies noted are centre of emergency activity which could extend +/- 20kHz.

Other frequencies could be activated on a per country basis -

stay tuned to the WIA News for activations.
